

Outcomes Measures Application System Requirements

Minimum System Requirements

The MHSA Outcomes Measures Application (OMA) is a web-based ASP.NET computer program designed to run on a Windows operating system with Internet Explorer 6. JavaScript and Cookies **must be** enabled in order for the application to function correctly. The use of any other web browser may result in the user interface displaying incorrectly or features being disabled and is not recommended.

An Integrated System (IS) or Department of Mental Health (DMH) NT username and password is required to sign into OMA. If accessing this application from outside the DMH network, an internet access and a RSA SecurID will also be required.

NOTE: Using a DMH NT username and password will only allow viewing data.

Recommended System Requirements	
Computer/Processor	Pentium III Processor 500MHz or better
Operating System	Windows 2000 or Windows XP
Memory	128MB RAM
Display	SXGA (1280 x 1024) or higher-resolution
Browser	Internet Explorer 6
Network Connection	Broadband internet access (Cable, DSL or T1)*

**If accessing from outside the DMH network.*
